Objective

Enrolled in Full-Stack bootcamp in December of 2021. My objective is to find a career that enables me to utilize what I've learned to help individuals with their projects.

Technical Skills

Frontend: HTML5; CSS; JQuery; JavaScript; Bootstrap
Backend: Node.js

Projects

Code Quiz | codeQuiz | Deployed

Created myself to finish off the JavaScript unit for week 4 of boot camp.

- Allows for a user to take a simple code quiz to test their knowledge.
- A user will input their answers by selecting through multiple choice. If an answer is incorrect the timer will decrease. After quiz is done their high score can be recorded within local storage.

- Tools/Languages: HTML; CSS; JavaScript

Weather Dashboard | weatherDashboard | Deployed

Created myself to finish off API call section for week 6 of boot camp.

- Allows for a user to check a cities weather and 5-day forecast.
- A user will input any city that they can think of to check the current weather and the next 5-days weather. They can save their history within local storage. I was required to call an API for each search that was inputed.

- Tools/Languages: HTML; CSS; JavaScript

Professional README Generator | professionalReadMe | Deployed

Created myself to begin my journey working with Node in the backend.

- Allows for a user to generate a README.md file without making one themselves.
- A user must download the application and the NPM inquirer to be able to run this application. By using their console they can answer prompted questions to fill out all requirements for a professional README.md file.

- Tools/Languages: HTML; JavaScript; Node.js

Work Experience

Quiznos   08/2018 - currently
